ERRATA

The name of the author of the paper entitled " Etude de l'infection expérimentale à *Trypanosoma gambiense* du *Cricetomys gambianus* ", this *Bulletin*, 1957, v. 54, 1297, should read LARIVIERE, and not LARVIERE.

In the abstract of the paper by REID and LIM, this *Bulletin*, 1958, v. 55, 314, line 4, the 10% quoted refers to the population of the area surveyed and not to the incidence of sea-snake bites. The incidence of bites was, in fact, some 1% of the population at risk.

In the abstract of the paper by SADUN *et al.*, this *Bulletin*, 1958, v. 55, 187, para. 1, these authors were represented as stating that *Echinococcus multilocularis* has been reported in wolves and moose in Minnesota. This is incorrect. They were referring to RILEY [*ibid.*, 1940, v. 37, 587] who stated that *Echinococcus* had been found in wolves and moose in Minnesota, but did not specify what species of *Echinococcus* had been found.

In the abstract of the paper by KARTMAN *et al.*, this *Bulletin*, 1959, v. 55, 763, para. 1, line 4, the sentence " The principal reservoirs are believed to be prairie dogs, *Cynomys*, wood rats, *Neotoma*, and ground squirrels, *Citellus* " should read: " The principal reservoirs were believed by Eskey and Haas (1940) to be prairie dogs, *Cynomys*, wood rats, *Neotoma*, and ground squirrels, *Citellus*, but the present authors remark that there has been in recent years a growing conviction among plague workers that rodents other than ground squirrels and the large conspicuous species may be more usual reservoirs of *P. pestis*."

In the abstract of the paper by CLYDE & SHUTE, this *Bulletin*, 1958, v. 55, 982, the last sentence should read: " The administration of an antacid simultaneously with the dose of chloroquine hydroxynaphthoate halved the antimalarial efficiency of this salt "—not " doubled " as in the abstract.

In the abstract of the paper by WADDY, this *Bulletin*, 1958, v. 55, 1063, the second sentence of the last paragraph should read: " . . . the international dissemination of medical information is met by the monthly *Epidemiological and Vital Statistics Report* issued by the World Health Organization . . . "
